Mounting instructions: Fasten securely to flat rigid surface with two 8-32 X 1¼ screws. Torque to 24-inch pounds (2.7N.m) for best performance.

ELECTRICAL INFORMATION

MB Series is provided with a 4-conductor shielded cable (AWG 28) 5 feet (1.5m) long.

Wiring Color Code complies with ISA S37.8 "Specifications and Tests for Strain Gage Force Transducers" and SMA Load Cell Terminology.

APPLICATION NOTES

1. The Minibeam load cells are designed for controlled environment applications. In general, they can be used anywhere a readout instrument is used.

2. NOTE: Please exercise caution during handling and installation of these load cells. The application of a force equaling more than 150% of the rated capacity (75 lbs. on MB-5, 15 lbs. on MB-10; 37.5 lbs. on MB-25, etc.) can result in irreparable damage.

3. These units are not intended for submerged operation. A Moisture Resistant coating is applied for capacities 25 thru 250 lbs. to protect MB Series from high humidity conditions up to and including 95% Relative Humidity and periodic exposure to condensation.

For spring overload details, request IFI #32

PERFORMANCE DATA

Nominal Output—mV/V ........................................ 3
Input Resistance—Ohms ............................ 350 +50/ -3.5
Output Resistance—Ohms .................. 350 ±3.5
Recommended Excitation .............. 10 VDC
Non-Linearity—% Full Scale .............. < ±0.03%
Hysteresis—% Full Scale ...................... < ±0.02%
Compensated Temp. Range ............ 0°F to 150°F
........................................ (-15°C to 65°C)
Temperature effect on zero—% Rated Output/100°F (% Rated Output/55.6°C) ±0.15
Zero Balance—% Rated Output .................. < ±1
